DETAILED ACTION

1. The application was abandoned April 26, 2005 for failure to timely file a proper reply to the office action mailed on August 10, 2004.
2. On November 30, 2005, a petition under 37 C.F.R. § 1.137(b) was GRANTED by the Office of Petitions to revive the above-identified application. Thus prosecution of the application is hereby REOPENED and presented to be examined upon its merits.
3. The case is subject to the following Election/Restrictions initially presented August 10, 2004 and re-submitted herein for the applicants' convenience.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23, drawn to a system and method for leasing artificial agents, classified in class 705 subclass 80
 - II. Claims 24,39 and 46-61, drawn to a consulting system method for artificial agents classified in class 705, subclass 37.
 - III. Claims 40-45 and 62-66, drawn to methods of creating artificial agents, classified in class 706 subclass 45

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP 806.05(c)). In the instant case, the combination as claimed

Art Unit: 3624

does not require the particulars of the subcombination as claimed because the subcombination among other things, an agent factory. The subcombination has a separate utility for displaying recommendations.

5. Inventions Group I and Group III are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP j 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the particulars of the subcombination which requires testing the effectiveness of different trading rules on a window of historical data, selecting a subset of different technical trading, etc. The subcombination has separate utility such as it can be used in different systems not related to leasing.

6. Inventions Group II and Group III are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP j 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require the particulars of the subcombination which requires testing the effectiveness of different trading rules on a window of historical data, selecting a subset of different technical trading, etc. The subcombination has separate utility such as it can be used in different system not related to consulting.

7. Search required for Group I is not required for Group II, restriction for examination

Art Unit: 3624

Because these inventions are distinct for the reasons given above and the purposes as indicated is proper.

8. acquired a separate status in the art as shown by their different classification, restriction

Because these inventions are distinct for the reasons given above and have for examination purposes as indicated is proper.
